Scope

Scope
(Inclusions & Exclusions)

Waste records cover all CWM managed commercial buildings, retail spaces and public areas.

Estimation Techniques
& Assumptions

CWM received Zero Waste to Landfill assurance in 2019. To be considered ZWtL:

A threshold of 95% of a company's waste must be diverted from landfill, the remaining 5% may comprise:

- Waste streams for which it is not possible or practical to trace end destination
- Non-material waste streams (no more than 1% of total waste)
- Waste generated as a result of accidents or incidents outside of CWG's operational control

Waste which must legally be sent to landfill may be excluded from the threshold entirely.
